KEIGIO® TABLE MODULE

KEIGIO® TABLE – Special Module of the 54x54 System

TABLE: KEIGIO®'s modular design solution for flexible work and learning environments.

The KEIGIO® TABLE module expands the 54x54 System by introducing a functional workspace element that harmoniously integrates with the existing seating modules. With its characteristic geometry — a 54×54 cm top and total height of 92 cm — the TABLE module includes an 18 cm base, ensuring a standard tabletop height of 74 cm and an additional under-shelf designed to hold a laptop, notebook, or book.

FUNCTIONALITY

This new module transforms the 54x54 System into a complete environment for both educational and professional settings.

When combined with the H64 module, which serves as a perfectly matching seat, the TABLE creates a comfortable and ergonomic workstation.

The working surface of 54×54 cm offers sufficient space for digital or manual tasks — from following lessons to taking notes or working on a laptop.

The TABLE module adds dynamism to the modular system, bridging the gap between leisure and work areas and adapting seamlessly to libraries, offices, schools, lounges, or collaborative zones.

DESIGN AND MATERIALITY

Like all modules of the 54x54 System, the TABLE module features the distinctive refined detailing and rounded edges that reveal the material's layered structure, emphasizing both craftsmanship and design coherence. Available in marine-grade plywood or lacquered MDF, it can be customized in any RAL color to match the project's visual identity.

CONFIGURATION and CUSTOMIZATION

The TABLE module maintains the system's modular logic, connecting to other elements through the KEIGIO® Joint.

It can stand alone as a single workstation or be arranged in multiple compositions for group use. Customization is available for finishes, colors, and accessories — including the addition of the 50×50 cushion for the associated H64 seat module, enhancing comfort without compromising visual harmony.

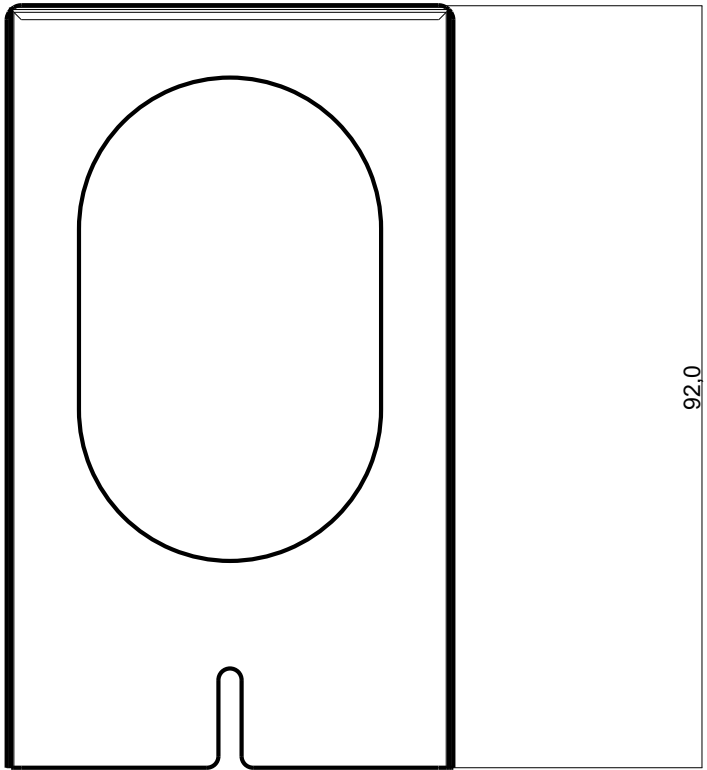

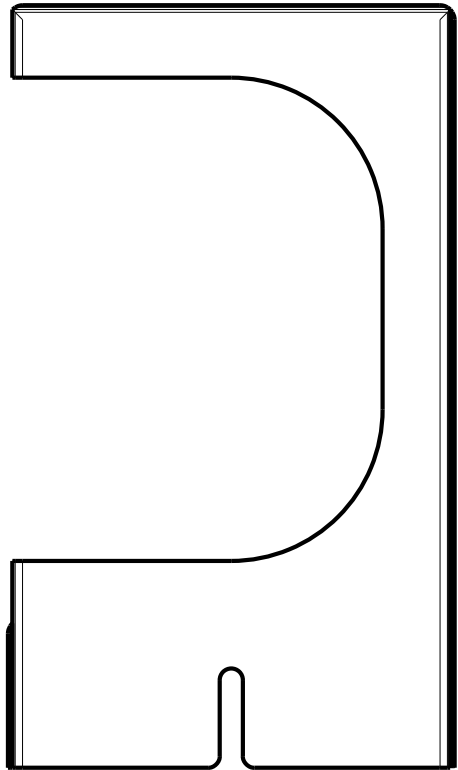

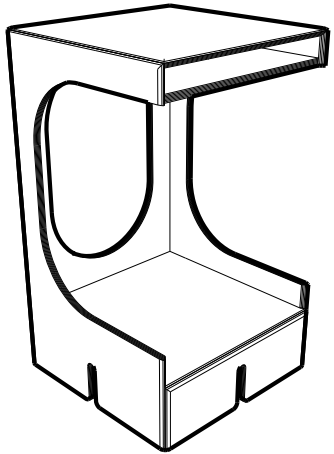

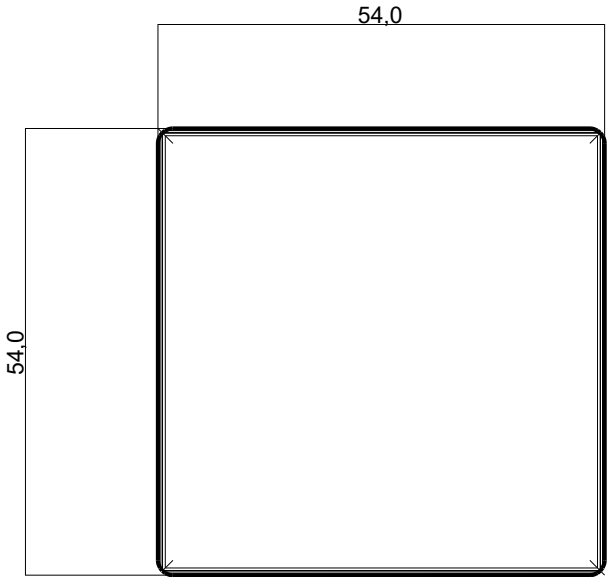

DESIGN & PHILOSOPHY

The KEIGIO® TABLE module embodies the same design philosophy that defines the entire 54x54 System: modularity, flexibility, and material integrity. It turns a simple desk into a modular element capable of reconfiguring spaces fluidly — a bridge between learning, working, and relaxing within the same coherent design language.

TABLE MODULE + H64 MODULE as SEAT + CUSHION
