Modular Shelving Unit

The **KEIGIO® SHELF** system offers countless configurations to suit various spaces and preferences. Constructed with molded raw aluminum joints and arms, it ensures durability and stability.

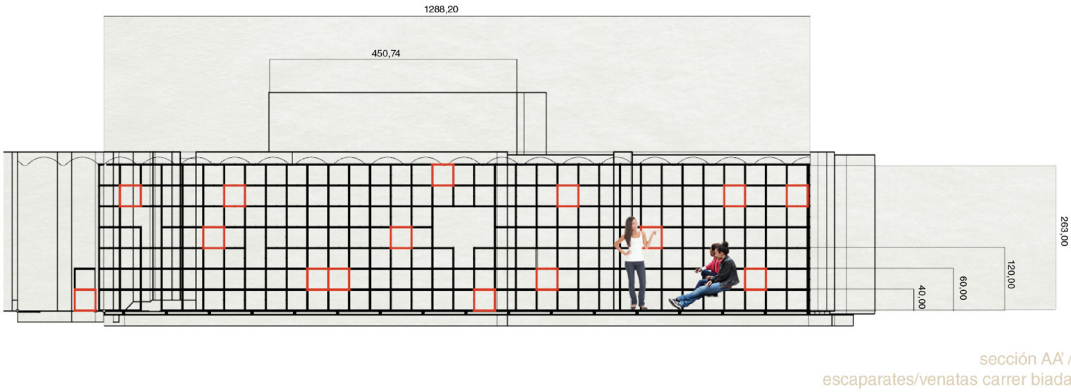

What sets it apart is the intuitive assembly process, requiring no additional tools. Users can easily customize sizes and layouts to meet changing needs.

Choose from stainless steel, security glass, or transparent methacrylate surfaces to enhance visual appeal and seamlessly integrate into any environment.

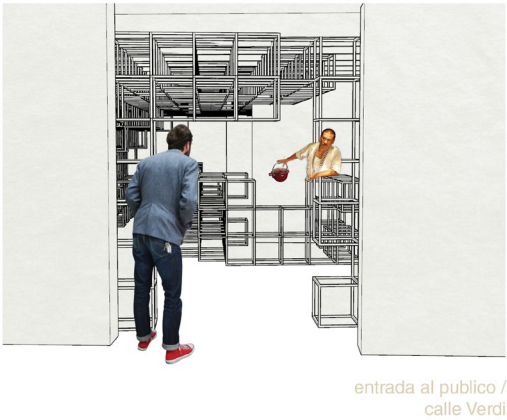

KEIGIO® SHELF

section

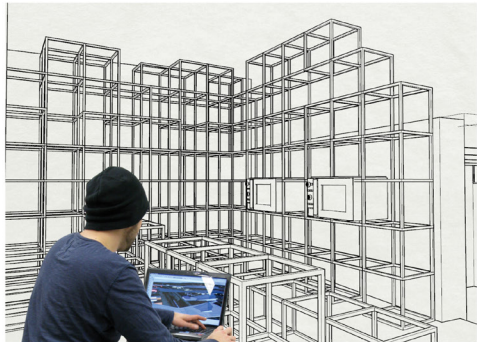

details 1

KEIGIO® SHELF is a modular system inspired by the ancient Japanese art of interlocking assembly called Sashimono, literally “things together”. Our system is based on simplicity. Without the need for screws or tools, we create a very solid structure with an industrial style.
