

Technical Sheet
KEIGIO® LAMP

KEIGIO® TABLE

The **KEIGIO® LAMP** system is composed of 3 elements of the same size and perfectly interchangeable and modular between them. All three elements are made of translucent methacrylate in neon colors. Each piece is laser cutted and assembled by the expert hands of our trusted craftsmen.

Every modular elements have a 30X30 centimeters base made of high quality methacrylate. We have taken as a reference a classic '80s game, the Rubik's Snake, and we have scale it to get a totally modular lamp.

Every little detail is necessary for KEIGIO® LAMP to work. The closed module has a dual function, that of a construction element and that of lamp as it is inside or not with a LED lighting body. Thanks to the intelligent Wi-Fi smart bulbs, the lighting LED can be controlled with your and your friends' mobile phone.

The open form will be a construction element and will have the dual function of being able to accommodate your favorite objects inside. Books, magazines, souvenirs and any other decoration that can make your lamp system original and unique.

They are easily configurable to obtain infinite different luminous shapes. Have fun configuring and reconfiguring your LAMP by recreating the typical forms of the 1980s game.

KEIGIO® LAMP system uses Fastmount® male and female clips with which the different modules can hook together.

Thanks to Fastmount® our dream has come true. Play with the methacrylate lines in super bright neon colors and give life to true totally reconfigurable art installations.

Methacrylate

We exclusively employ 100% recycled polymethylmethacrylate (PMMA) cast sheets in our manufacturing process, demonstrating our unwavering dedication to sustainability. Committed to upholding the highest standards, our operations are certified under UNI EN ISO 9001:2015, ensuring quality control and excellence throughout the production chain.

Our environmental responsibility extends to compliance with European Union regulations, as evidenced by our REACH Certification. This guarantees that our materials meet stringent safety and environmental requirements, prioritizing the well-being of both consumers and the planet.

Furthermore, our commitment to eco-friendly practices is fortified by the RoHS Certification, affirming that our cast sheets are free from hazardous substances, contributing to a safer and healthier environment.

To provide full transparency about our product's environmental impact, we proudly hold the Certification EPD (Environmental Product Declaration). This declaration offers detailed insights into the life cycle of our cast sheets, empowering consumers to make informed choices that align with their sustainability values.

In our ongoing journey towards environmental stewardship, we are thrilled to announce our Carbon Neutrality status. By meticulously managing our carbon footprint and engaging in offset initiatives, we actively contribute to a circular economy while minimizing our overall environmental impact.

Opt for our products, knowing that our exclusive use of 100% recycled PMMA cast sheets reflects a commitment to quality, sustainability, and a brighter, greener future for all.
