

KEIGIO® LOCKER

54x54 System

#LOCKERS #MODULARDESIGN #SMARTSYSTEM #FLEXOFFICE

Discover the new Lockers of the KEIGIO® 54x54 modular system.

KEIGIO® expands its innovative modular furniture system with the new Lockers, designed to integrate seamlessly into the **54x54 SYSTEM**.

While modularity is standard in the lockers market, our products go beyond by integrating into a **complete modular ecosystem**. The **KEIGIO® 54x54 SYSTEM** brings together rigid seating, Puffs, DESKs, and now the new Lockers, offering a **Flex&Fun** furnishing solution for projects in offices, schools, hotels, libraries, and any space—whether it's a communal area, a service zone, an operational **workspace**, or even rest and recreational areas.

KEIGIO®
MODULAR DESIGN

www.keigio.com

Our philosophy, “**FLEX&FUN**”, reflects our commitment to providing design solutions that allow people to express their creativity and enjoy a more dynamic and inspiring work environment.

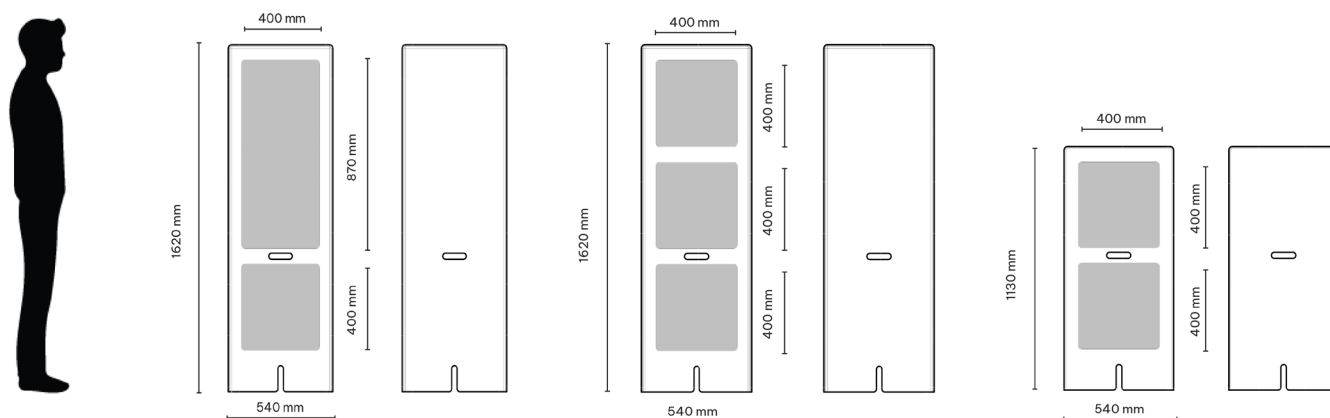

High-quality materials and customizable design

Made from organic materials like pine plywood, **KEIGIO® LOCKER** can be lacquered in any color, maintaining the brand’s elegant **style**, with rounded edges and our signature handles cut on all four sides. We also introduce a new **Entry Level** material option at an unbeatable price: MDF laminated with white melamine.

Innovation and personalization

KEIGIO® LOCKER is equipped with a **wireless locking system**, efficient and secure. For further **personalization**, we offer custom stickers with numbers or letters, making it easier to identify the lockers and adding a distinctive design touch. Additionally, all our products are made from **premium certified materials**, and we support **sustainability** through Valdelia.

With a standard base of 54x54 cm, these lockers are available in two heights: **162 cm** and **113 cm**, adapting to the needs of any modern workspace. The 162 cm version also comes in two variations, with **two or three doors**. In the two-door variant, the taller door space is perfect for hanging clothes, offering a versatile solution for storing personal items and garments.
